Safe Patient Lifting - The Importance of Moving

Encouraging residents to keep active for as long as possible is vital to wellbeing and long-term health prospects. Selecting the right equipment and environment, combined with best practice in moving and handling procedures, empowers the resident to engage with the process and maintain levels of strength and mobility.

The following is a guide to use of lifting equipment, but an individual risk assessment for each resident is essential in order to tailor care appropriately.

Lifting cushions

Regular falls can cause a further fear of falling, resulting in a reduction of activity if not handled safely and in a dignified manner. The Camel and ELK lifting cushions are light, portable and perfect for frequent fallers.

Stand Aid

Stand Aids are ideal to move residents who can assist to some extent in a sit to stand transfer. Encouraging the resident to use this piece of equipment while they are still able will promote mobility and independence.

Mobile Hoists

Mobile hoists are ideal for moving residents with no mobility or strength to support their own weight. They are a flexible solution but should not be used to move people long distances. Always assess the environment for space before using.

Ceiling Hoists

As with mobile hoists, ceiling hoists are for moving people with no mobility or strength to support their own weight. They are generally less arduous for a carer to operate than a mobile hoist and are the more suitable for longer distance transfers.

Pallas Stand Aid

The Pallas is a compact stand aid for individuals able to bear partial body weight when transitioning between seated and standing positions, such as from bed to wheelchair and wheelchair to toilet. Ideal for home use, and healthcare facilities. Extra lifting hooks on this model allows for seated transfers, increasing its versatility for multiple uses.

Product Code: 175 : 011-01516UK
: 011-01528UK

Key Features and Benefits

- Pallas is a compact, active stand aid with a lifting pattern closely imitating the user's natural way of standing.
- Developed for users who are weight bearing to a limited degree and who can participate actively with the carer during transfers.
- Adjustable knee support to allow for tall or short patients.
- Can be adapted to use for walking training.
- Foot plate height extensions.
- Ergonomic handles with several gripping positions.
- Low friction wheels.
- Electrical emergency lowering.

Stellar 160 Stand Aid

Stellar is the new state of the art stand aid. With its elegant Scandinavian design with supreme functionality the Stellar has been developed to move users, who can assist to some extent in a sit to sit transfer.

Key Features & Benefits

- **Compact dimensions** with a small turning radius, with the curved legs allowing access to larger and riser chairs, or power chairs.
- **Electrical leg adjustment** to be able to suit the patients needs with ease for the carer.
- **Adjustable knee support.** Being able to adjust the Height & Angle gives the user the most comfortable transfer
- **Advanced control system.** Linakcontrol system - The main functions are emergency stop, quick and slow, up and down. An LCD screen shows the condition of the battery, service overview, and lifting mode.
- **Patented sling hooks** give a safe, simple sling attachment. The padded knee support is both height and angle adjustable for a perfect fit.

Product Code: 011-01610EU

Technical Specifications

Lifting capacity (SWL)	160 kg
Lifting method	Electrical
Leg spreading method	Electrical
Emergency lowering	Manual
Emergency stop	Manual
Total weight	54 kg
Battery capacity	60-80 lifts
Min. width	665 mm

Titan 375 Mobile Hoist

The Titan 375 gives bariatric transfer a new dimension in catering to individual needs whilst blending into the working environment. The flexibility helps the client to stand, to walk, to be lifted and even be weighed.

Key Features & Benefits

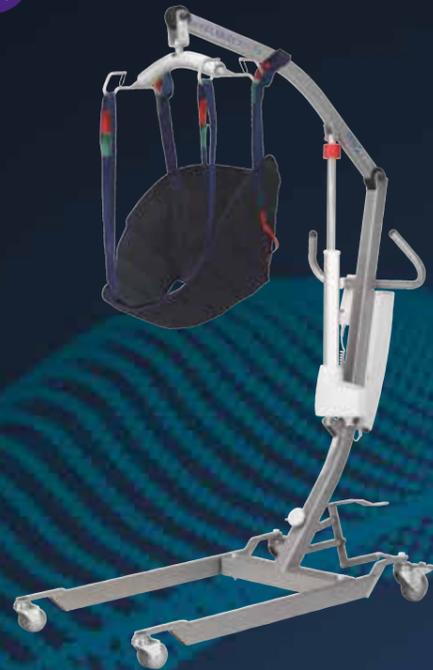

- **Self drive unit** with simple joystick control of the movement thus ensuring optimal ergonomics for the carer.
- **Large rear wheels and Two sets of front wheels** to ease movement on all surfaces.
- **Electrical leg adjustment and spreader bars** to be able to suit the patients needs with ease for the carer.
- **High capacity Battery** with integrated charging system
- **Patented sling hooks** give a safe, simple sling attachment. The padded knee support is both height and angle adjustable for a perfect fit.

Product Code: 050-00515

Technical Specifications

Lifting capacity (SWL)	375 kg
Max height legs	130 mm
Min height (free height)	50 mm
Wheel diameter back/front	325/100
Length of arms	900 mm
Length of legs	1350 mm
Turning radius	1400 mm
Lifting height min	200 mm
Lifting height max	1750 mm
Total weight	145 kg

Winn'Motion 175

Meets standard en ISO 10535: 2007 for the transfer for people with limited movement by hoist. Winn'Motion model 150 also available.

Key Features and Benefits

- Emergency stop button on the side of the control box.
- Audible signal when the battery is running low.
- Jack with anti-collapse system.
- Jack can be manually released using an ergonomic rotary knob.
- Feet can be manually moved further apart using a pedal system.
- **Light and compact** the WINN'MOTION is adapted for use in Care homes and in the home.
- **Easy to transport and store away.**
- **The excellent lifting range allows patients to be lifted from the floor**
- **With a secured 4 point spreader bar** patients can be moved securely and with comfort.

Solar Mobile Lifter

Solar's Scandinavian design with its sweeping elegant lines makes an attractive choice for use at home or in a healthcare environment. Its excellent lifting range allows clients to be lifted from the floor.

Key Features and Benefits

- Electrical leg adjustment as standard.
- Emergency stop and emergency lowering.
- Advanced Linak control system.
- Narrow base to accommodate narrow doors.
- Curved legs giving a wide spread to access large chairs.
- **Solar's Scandinavian design** with its sweeping elegant lines makes it an attractive choice for home care or institutional use.
- **Advanced control system** with emergency stop. The LCD screen shows the condition of the battery, service overview and lifting mode.
- **Lift patients from the floor** with an excellent lifting range of 440mm to 1780mm.
- **The mobile lift is easy to manoeuvre** thanks to the new ergonomic hand grip design and smooth rolling wheels.
- **The system also records and shows the number of lifts** performed and also the date of the next service.
- **For patients up to 175kg**

Luna Ceiling Hoist IPx4

The innovative Luna Ceiling Hoist combines Scandinavian design with excellent functionality, providing a mix of fixed and portable lifting solutions within one device.

Key Features and Benefits

- **Can be used as a fixed or portable hoist** which is a cost effective solution covering a mix of lifting requirements
- **Quick release mechanism** to detach the lift from the track in a matter of seconds –no tools required
- **Hand control** charged through wall mounted docking station and has a secure and reliable mechanism for hooking the hand control to the Luna lift.
- **Patented Ergolet spreader bar and sling hook system** ensuring safe and simple sling attachment. Minimum downward pressure locks the sling hook. Pull upwards to unlock sling hook.

- **Charging indicators** on the hand control including low battery visual LED
- IPx4 means it is safe to use in wet environments allowing for safe transfers in bathrooms
- IPx7 hand control tolerates immersion in water
- Electrical and manual emergency stop with emergency lowering function on both the hand control and Luna unit itself

- Charging indicators
- Power on indicators
- Multiple accessories, including scales, easy mover, etc.
- Overload protection
- Emergency brake system
- Can be fixed to existing tracking
- Children cartoon casing also available

● Spreader bars

There is a complete range of spreader bars in various sizes and models to suit all care needs and transfer situations. All spreader bars are equipped with our patented sling hook system.

The two point spreader bar is suitable for a standard transfer. It is available in 3 widths.

There is also the unique V shaped 3-point spreader bar. This increases the distance between the shoulder strap section and the leg strap section, opening up the sling for a more comfortable lift.

In other situations it will be more suitable to use one of our 4-point spreader bar solutions. We have 2 different types.

The largest one being the H-solution with 4 points equally placed from the center for optimal weight distribution. There is a more flexible option also where you use a standard 2 point spreader bar and then add 2 extra side spreader bars onto the end 2 points.

Then there is a flexible 4 point spreader bar which fits as standard for the width of shoulders and hips.

By using 3-point or one of the 4-point spreader bars, you will have a more open and flexible transfer, which take the clients special needs into consideration.

Key standard functions

- Extensive range for specific and general use
- Patented sling hooks on all spreader bars
- Easily interchangeable to allow for multiple use
- Can be used on both mobile lifters and ceiling hoists

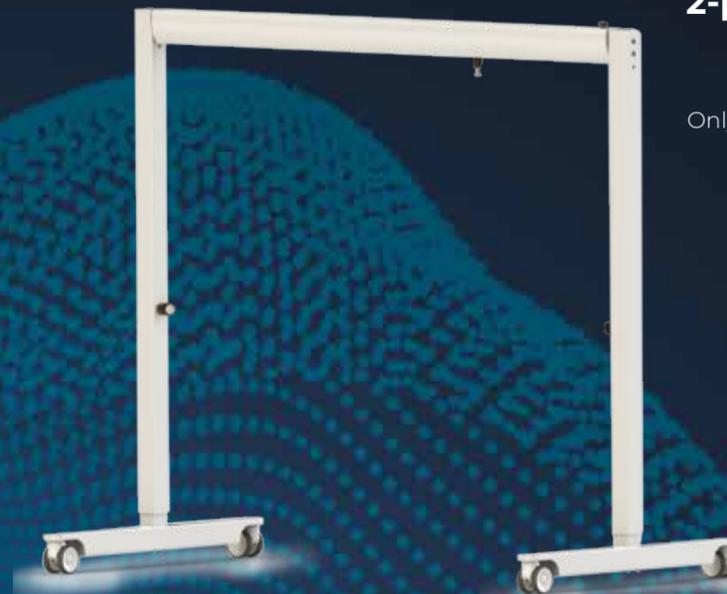

Lifting

2-post system

Height & width adjustable

Only takes 30 minutes to assemble

● Mobile Flex

Suitable for people who need an immediate and/or temporary lifting solution that can be easily and simply fitted, used and removed. The Mobile Flex is easy to assemble. No tools are required to adjust the height and width to provide reliable temporary solutions.

Adjusting the height via gas spring is carried out in just a few seconds providing immediate use for the carer and client. The telescopic tracks give enough lifting height to provide solutions that are suitable for most rooms and transfer situations. The Mobile Flex when combined with the innovative Luna ceiling lift, is a simple and functional lifting system and the ideal choice for either home care or institutional use.

The Mobile Flex provides a lifting capacity up to 275kg thus utilizing the full range of the Luna ceiling lift.

Mix and match

Maybe you just need a 2-post system over a bed, or maybe you need full room coverage with a 4-post system. No matter what your needs, the Mobile Flex is a flexible solution.

4-post system

Full adjustable, room covering and free-standing
Only takes 1 hour to assemble

SLINGS

Practical and comfortable our slings have excellent seating comfort and ensure correct user positioning.

Each sling is colour coded to identify size. Please see our user guide on the opposite page for detailed information.

All of the slings are easily compatible with the Ergolet hook system which are on the spreader bars we also have available.

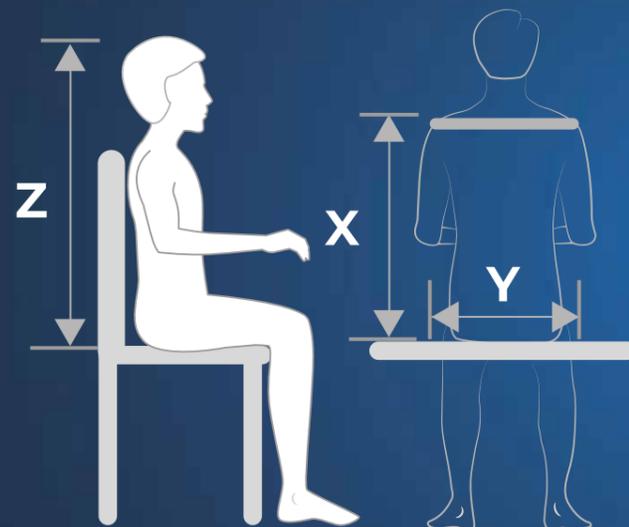

There are 3 different materials on the slings

- Polyester – Extra durable and easy to clean
- Polyester Net – Suitable especially for bathing
- Nonwoven – For disposable slings

Y = Hip Measurement

X = Measurement from neck to lower back

Z = Measurement from head to lower back

Disposable Comfort Sling

Universal Amputee Sling with extra leg straps

Universal Basic Sling

Camel Lifting Cushion

The Camel Lifting Cushion will both sit up and lift a fallen person.

Easy to fit

- Lifting cushion is inflated using an Airflo Compressor with a simple hand control
- Simple to use, requiring very little training
- Suitable for indoor and outdoor use
- Can be used independently or assisted

Simple to maintain

- Clean using a proprietary non-abrasive mild liquid cleaner.
- Easy to deflate, fold away and store in the carry bag provided
- Does not need a LOLER certificate
- The material is designed to exceptionally high standards with extraordinary durability, strength & performance in the toughest of environments

Safe to use

- Lifts the frailest person up to 320 kg from the floor
- Stable and supportive
- Ideal for carers of individuals with neurological disorders who fall regularly

Improves well-being

- Provides a safe, dignified lift for a fallen person
- Reduces the risk of musculoskeletal injury for the carer
- Individuals with a cognitive impairment are less distressed when lifted with a Camel
- The backrest gives additional support and is particularly suitable for bariatric patients

Technical Specifications

Max user weight	320 kg
Max height	56 cm
Min height	Flat
Seat depth	47 cm
Total length	112 cm
Width	70 cm
Total product weight	6.5 kg
Back/headrest length	81 cm
Airflo Compressor	24
Lifting performance per charge	up to 4 lifts

Features

- 1. Easy to setup** - connect the four hoses from the hand control to the corresponding numbers and coloured connectors on the Camel.
- 2. The head should lie on the Camel badge** and the body should lie centrally.
- 3. The backrest** may be partially inflated before the lower sections.

- 4. Made from very strong polyurethane** coated nylon material.
- 5. Each layer inflates individually** ideal for single-handed care.

Accessories

- Slidesheet
- Camel Carry Bag

ELK Lifting Cushion

The ELK is a lifting cushion designed to lift from the floor.

Easy to fit

- Lifting cushion is inflated using an Airflo Compressor with a simple hand control
- Simple to use, requiring very little training
- Suitable for use inside or out
- Can be used by one carer

Simple to maintain

- Clean using a proprietary non-abrasive mild liquid cleaner.
- Easy to deflate, fold away and store
- Does not need a LOLER certificate
- The material is designed to exceptionally high standards with extraordinary durability, strength & performance in the toughest of environments

Safe to use

- Lifts the frailest person up to 70 stone / 450 kg from the floor
- Exceptionally rigid and stable
- Ideal for carers of individuals with neurological disorders who fall regularly

Improves well-being

- Provides a safe, dignified lift for a fallen person
- Reduces the risk of musculoskeletal injury for the carer
- Can be used in confined spaces where traditional lifting equipment may not fit

Technical Specifications

Max user weight	450 kg
Max height	56 cm
Min height	Flat
Seat depth	50 cm
Width	57 cm
Total product weight	3.6 kg
Airflo Compressor	24
Lifting performance per charge	Up to 8 lifts

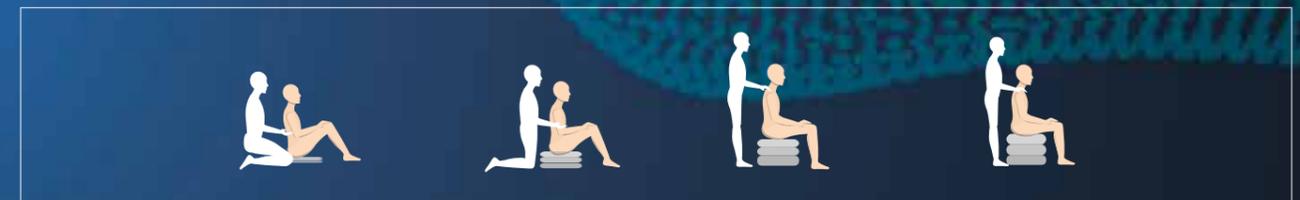

Features

- 1. 4-Way Hand Control.**
- 2. Made from very strong polyurethane** coated nylon material.
- 3. Remove or keep stability bar** when transferring someone onto the ELK to provide extra comfort for the user.
- 4. Can be used to lift a stretcher.**
- 5. Easy to setup** - connect the four hoses from the hand control to the corresponding numbers and coloured connectors on the Camel.
- 6. Powered by an Airflo 24 Compressor.**

Accessories

- ELK Stretcher Bars
- Slidesheet
- ELK End Cap Set

Post Fall Management

While 50% of adults aged over 80 will fall at least once a year (NICE), in care homes this is three times more likely to happen (Helped the Aged). In 45% of cases, the person who has fallen is uninjured (Wales Ambulance Service Trust) but the ambulance service is routinely called to assist with a lift.

Uninjured fallen residents are routinely categorised as a low priority with Ambulance Trusts and this can lead to long wait times for paramedic help to arrive.

There is a direct correlation between recovery and how long people lie on the floor after a fall.

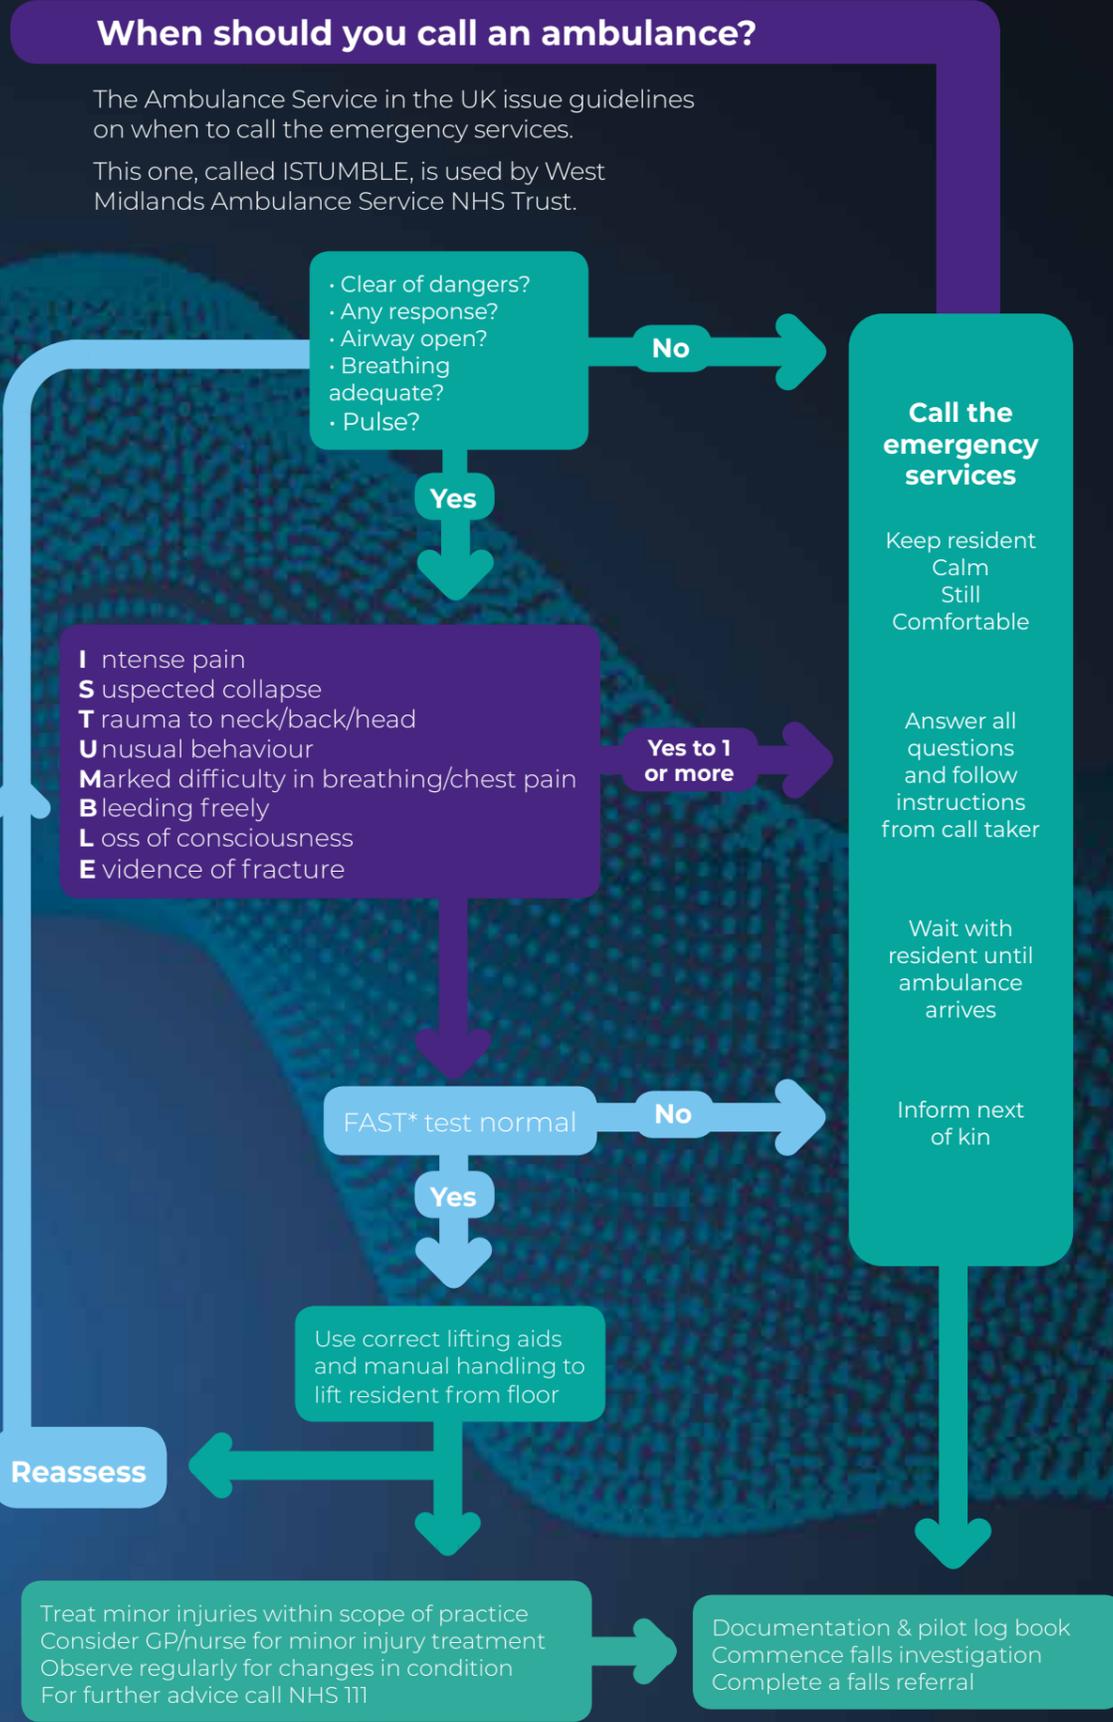

Lying on the floor for a long time following a fall is one of the most serious consequences. Even a delayed initial recovery greater than 10 minutes will begin to impact a fallen resident and a 'Long-Lie' of more than an hour is associated with;

- Skin damage resulting in pressure sores
- Reduced confidence
- Increased anxiety
- Hypothermia
- Dehydration
- Pneumonia
- Kidney failure (through rhabdomyolysis)
- Death

To perform a health assessment on a fallen resident many ambulance services use an algorithm called ISTUMBLE, which care homes across the UK are adopting in the aim to align to best practice in post fall management. The health assessment used with the appropriate piece of lifting equipment safeguards the lives of residents and avoids unnecessary hospital admissions.

You can use the algorithm as pictured on the right or through the iSTUMBLE app, this is recognized and used by paramedics across the UK to inform decisions around lifting. It simply uses a series of questions to work you through the algorithm and let you know the best course of action to take. Available through Google Play and the App Store.

Bathing

Triton Hygiene Chair

The Triton Hygiene Chair is a new and improved powered, height adjustable, tilt-in-space shower commode chair.

Better working environment

- Correct working posture eliminates strain and stress on the caregiver's back, shoulders and knees.
- The height adjustment allows an optimal positioning of the chair, ensuring a correct working posture for the care giver.

Increased comfort

- With the electrical seat tilt and adjustable backrest, the Triton Dual makes it easy for the user to find the most comfortable sitting position.
- The lift height of 40 cm helps both the caregiver and the user.

Easy to Clean

- Developed from the Easy-Clean principle, which means there are no small corners or edges. The chair has closed screws/joinings and fully welded steel, which prevents water from entering the pipes. It is also treated with double coating which makes it rust resistant.

- IPx6W rated: Can be cleaned in washing machines up to 250 times due to LINAK IPX6 Washable DURAT™ (50 washes is standard).

Improves Independence

- For the user, the height adjustment means increased independence; it is possible to adjust the chair, so the user can reach the sink and look in the mirror - therefore the user can help take care of his own personal hygiene.

Product code: 044-00050
Technical Specifications

Max user weight	150 kg
Distance btw. arm rest	468 mm
Seat depth	430 mm
Seat width	460 mm
Seat height	544-943 mm
Total width	572 mm
Length	996-1294 mm
Total height (w/o head rest)	886-1540 mm
Weight	41 kg
Tilt angle	+7 to -30°
IP class	IPx6W
Charging time	6 hours
Battery capacity	80-100 lifting cycles

Bathing

Shower Trolley

The Shower Trolley provides a comfortable experience for both the user and carer.

Comfort

- Padded PVC polyester, caribbean green, 2 cm thick, secured on a water-repellent compact top.
- The variable height from 52 to 88 cm enables the caregiver to work in an ideal position, avoiding the risk of lumbar pain.
- Foam padding

Safety

- ABS base protector
- Centralised braking option with 4 x 125 mm castors, incl. 1 directional
- Ground clearance 13 cm, or 15 cm with centralised braking
- For patients up to 155 kg
- The 20 cm high protective side rails guarantee complete safety for patients

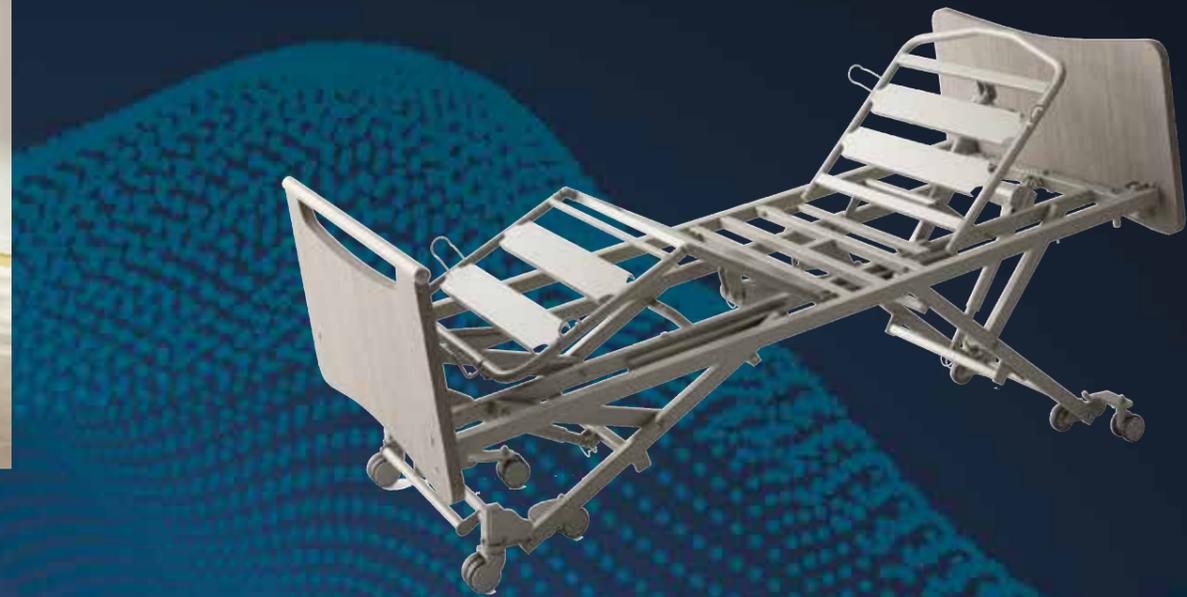

Convenient

- Slightly sloping base board for good water evacuation
- Hydraulic variable height that can be operated by a side pedal on both sides
- Head and foot push bars
- Thermoformed clothes basket, at the head of the trolley
- Retractable epoxy profiled side rails
- Pluggable drain outlet. Outlet pipe can be attached to be the side of the base board
- 185 cm outlet pipe, 0,4 cm
- 71.5 cm wide legs for improved stability

Product code: C4300
Technical Specifications

Dimensions	74 x 198 cm
Base board	1,78 m x 60 cm
Side rails	1,40 m x 20 cm
Weight	85 kg
Normal load in use	170 kg patient 155 kg accessories 15 kg

AERYS Bed

The AERYS Bed has been designed to fit effortlessly into a home or care environment but with the functionality of a medical bed.

- Adjustable height mechanism, which can be customised to suit the individual patient
- Flexible height range makes it ergonomically beneficial for care givers
- One touch button to move bed into a chair position
- A stop in the -5 Trendelenburg position to reposition the patient
- A Trendelenburg position at -12 for emergencies
- A full range of foot and headboard colour and design choices gives ultimate flexibility for a aesthetic finishes

Key Features

- Height range 24.5 – 80cm
- Size 90 x 200 cm
- SWL 200 kg
- Centralised braking on foot
- CPR electric back rest
- Compatible with the S.A.M Mobility Aid System
- Simple and easy to use controls

(1) Safe Working Load

ALDRYS Bed

The ALDRYS bed has a range of features and functions making it ideal for use in care facilities or in the home.

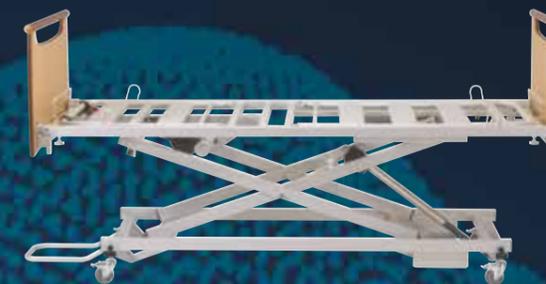

- In-built safety features ensure a safe environment for vulnerable and elderly patients
- The bed is made from good quality, robust materials and comes with a five-year warranty
- Powered using LINAK actuators, there are several back and leg rest options available
- The bed has been optimised for maximum underbed clearance, meaning mobile hoists easily fit underneath
- Bed lowers to a 22 cm floor clearance, reducing the impact of any falls
- A full range of foot and headboard colour and design choices gives ultimate flexibility for aesthetic finishes
- Flexible height range makes it ergonomically beneficial for care givers
- Coloured, traditional and padded Eleganti boards give patients a visual cue and provide extra protection in the event of a bump

Key Features

- Height range 22 to 78 cm
- Size 90 x 200 cm
- Compatible with the S.A.M Mobility Aid System
- Simple and easy to use controls
- Choice of colours and designs
- Several back and leg rest options

STEP 1: Choose the bed base according to the variable height

STEP 2: Choose the bed configuration

Electric leg rest with thigh section.

DO8P906/ Duo 160

Duo Bed

The Duo Bed is designed for couples who would like to stay in the same bed, but where one or both of them have limited mobility. They can rest, read or sleep comfortably without disturbing the other person.

- Sleeps couples with a combined weight of 270 kg comfortably
- Two separate bed bases enable individual independence
- Each side of the bed can be individually moved into reclining, half-seated or flat position
- Easy to clean bed with welded metal slats
- Suitable for use at home or in care facility. The bed comes in a choice of two colours and designs
- Flexible height range makes it ergonomically beneficial for care givers

Key Features

- Size: 140 (2x70) cm or 160 (2x80) x 200 cm
- Height range from 34 to 74 cm
- Combined width of 140 cm (2x70) or 160 cm (2x80)
- Bed on fixed feet
- MEDIDOM II* Light Dragon Tree colour trim, with long side panels and skirting
- Compatible with S.A.M Mobility Aid System
- Simple and easy to use controls

● ALUMINIUM AND WOODEN 1/2 SIDE RAILS

They are sliding side rails composed of 2 segments of identical dimensions. They are equipped with a patented locking/unlocking system guaranteeing the safety of its users. The metal part is aluminium, the upper part (handrail) is solid wood.

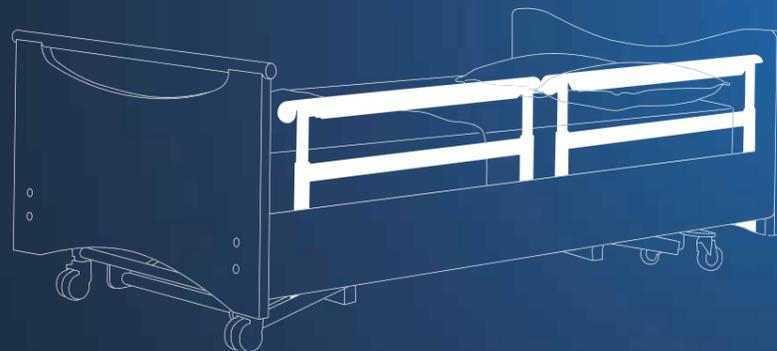

These side rails are removeable and compatible with

- All our beds
- The boards in our range
- Our bedding

They comply with the EN 60 601-2-52 requirements on spacing.

They are available in 2 finishes for the handrail:

- Paint varnished according to the colours of the colour chart
- Glass paint according to the colours of the colour chart.

● 3/4 EPOXY SIDE RAILS

These retractable side rails are compatible with all our beds. The rails are equipped with a fixation system in order to prevent bad installations and comply with the EN 60 601-2-52 requirements on spacing. They are compatible with our bedding (photos opposite) and available in 4 colours according to the colour of the bed frame.

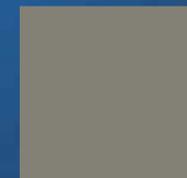

EPOXY PAINTS AVAILABLE

RAL 7035

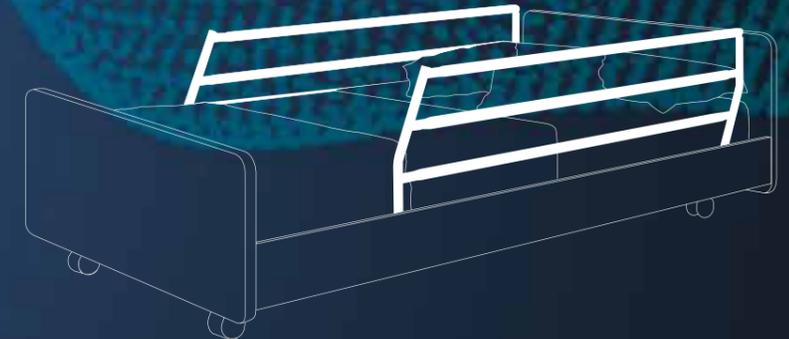

RAL 7035

RAL 7035

RAL 7035

● FULL LENGTH WOODEN SIDE RAILS

These are sliding side rails fixed in the headboards and footboards. They can be positioned on our entire bed line (width of 90/100/120/140/160cm).

These side rails are compatible with 3 boards of our range

CARMEN II

VAL DE VIE

COTE DE LUMIÈRE

They are available in 3 finishes:

- Light beech polymer coating
- Paint varnished according to the colours of the colour chart
- Gloss paint according to the colours of the colour chart.

● TECHNICAL AIDS SIDE RAILS

These are bed accessories providing new features to improve patients' mobility while facilitating the work of caregivers.

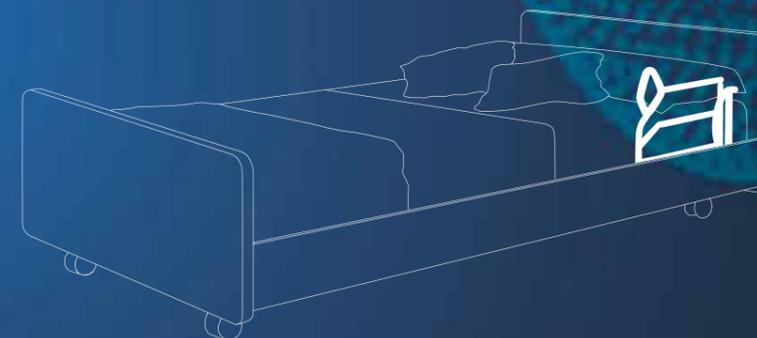

This range has been developed in collaboration with experts (occupational therapists and designers). Systems Aiding Mobility are patented accessories.

The SAM range is compatible with all our beds.

They comply with the 60 601-2-52 requirements on spacing.

PRINCIPLE:

The SAM range improved the motor pattern of the patient during his/her "lying-seated" movement and contributes take part in daily life activities by mobilizing these functional abilities. It improves caregiver safety postures and creates a free space for caregivers.

● Axtair Automorpho Axensor Range

The Axtair Automorpho mattress helps in preventing pressure ulcers in patients who are at high risk of pressure ulcer development or bedridden more than 15 hours a day. The mattress helps in treating existing pressure ulcers from stage 1 to 4.

The Range has a Patient Weight tolerance of 30 to 200 KG

Axensor AT12 & AT15

Product code: VAXT6

Key features

Overlay mattress 12 cm (AT12 model)

- 12 cm therapeutic air cells
- Weight limit: 165 kg

Mattress 15 cm (AT15 and AT15 DV models)

- 15.5 cm therapeutic air cells
- Weight limit: 180 kg

3 therapeutic zones:

- 2 static air cells located in head area
- 12 alternating air cells located in sacrum area
- 4 independent heel relief air cells

Optional supine position

- Selective deflation of air cells to prevent from cutaneous injuries and facilitate bronchial secretions for mechanically ventilated patients

CPR Valve

- Allows for deflating the mattress in less than 15 seconds

Axensor AT20

Full air mattress

- 20 cm therapeutic air cells
- Weight limit: 200 kg

4 therapeutic zones

- 2 static air cells located in head area
- 4 cervico-dorsal cells
- 10 air cells around the sacrum area with a static air base to ensure stability and avoid bottoming out
- 5 independent heel relief air cells

Lateral CPR valve

- Allows you to deflate the mattress in less than 15 seconds to proceed with an external cardiac massage

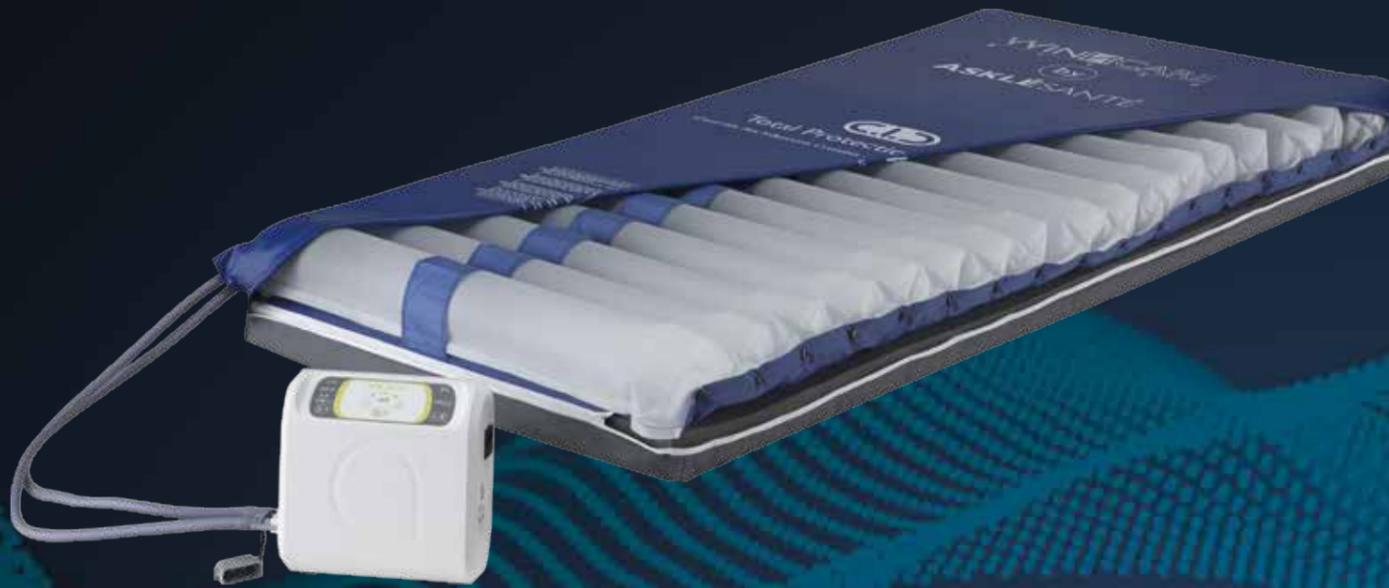

Key benefits

- Easy to use for caregivers
- Improved quality of treatment and patient's quality of life
- 3 widths available for more comfort
- Technical autodiagnostic by QR code
- Ready to use in a carrying bag
- Environmentally-friendly
- Eco-designed and manufactured in France

Pump

- Patented system of automatic and continuous calculation of inflation pressure according to patient's morphology and position in bed
- Automatic recognition of the connected pressure care system
- 3 modes: dynamic, static low pressure, care
- Communicating function
- "I" Touch for technical information
- Visual and audible alarms
- Serial number on the pump's back, simplified instruction and QR code on both sides.

Ekamove

The Ekamove is the latest generation in patient repositioning solutions, innovatively designed to deliver person specific pressure care.

Safe to use

- The air chambers provide a soft lift beneath the mattress which forms gently to the shape of the patient's body. This delivers less pressure and comparatively less shearing force than a plate system.
- A memory card is included to track patient repositioning, providing diagnostic and operational information to clinicians and service managers.
- Works effectively with standard, foam mattresses so can negate the need for more expensive hybrid or dynamic models.
- The Ekamove can be used with any hospital mattress and should be integrated into a healthcare bed with side protection
- The adjustable clamp on the control unit means it can fit tightly onto any type of bed end.
- Suitable for patients that weigh between 15 kg to 300 kg, with a wider bariatric version also available.
- For some patients, the Ekamove with leg extension maybe the more suitable model if a full length system is required.

Ultimate flexibility

- The Control Unit is simple to operate with 4 easy to use programmes.
- An additional specialist programme can be used when tailored care is required for more complex cases.
- The air chamber inflates to turn the patient to any angle between 0° and 30°, with a choice of dwell time settings between 10 minute minimum dwell time.

Technical Specifications

Weight	
Base unit:	2.8 kg
Air chambers incl. hoses:	1.5 kg

Internal power supply for the warning system in case of power failure:	2 no-maintenance batteries type AA 1.2V 1900mA

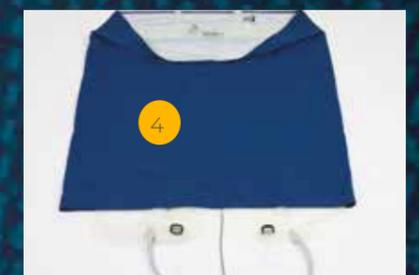

Pressure Care

Product code: MPCA191214

Key Features

1. Can be packed down into a small carrying bag for transportation and storage
2. Air chambers are placed under the mattress and inflate slowly and gently under the patient
3. The control unit is hooked over the foot of the bed using an adjustable bracket
4. A washable PU cover protects the air chambers
5. Air tubes are clearly marked left and right for easy fitting
6. An SD card is inserted under the control unit for tracking patient movement
7. Control unit includes quick release CPR function

Talk To Our Customer Service Team

Designing care home bedrooms

Ask one of Area Sales Managers to call and show you the range of care home bedroom furniture available. Using an online configurator, you can select bed and head and footboards colours, as well as complimentary furniture to make your environment a home from home experience.

Ceiling hoists

Our ceiling hoist specialists will visit your premises to measure the space and design the tracking and lifting pod system. Totally bespoke and fitted by a qualified engineer, the Scandinavian styling will bring a modern feel to your care setting.

Selecting beds, mattresses and mobile safe patient lifting devices

Talk to one of our Area Sales Managers about the products that are the best fit for your business. All our products come with a standard warranty and we also offer extended servicing and warranty packages.

Ask our customer service team

If you have any questions about us, our products or our services, or would like to organise a free demonstration or arrange a visit from one of our team, please get in touch.

What can we do for you?

Do you have questions about one or more products in this brochure or would you like to know more about WinnCare solutions for patient lifting, hygiene, beds, mattresses and cushions, please feel free to contact us at any time.
