The Original Patient Specific Sling from Mangar Health

The original patient specific clip slings have been designed to be used with a four-point hoist clip system, with or without powered positioning.

Patient slings avoid cross contamination and can be disposed of after the patient is charged from your care.

Advantages:

- It's so easy to switch to the Mangar Sling - No additional training required as staff will be familiar with our clip sling sizing and colours
- Slings are available in 6 different sizes and colour coded for easy identification
- Compatible with clip hoists used in hospitals and care environments
- Rigorous quality checks completed before dispatch from the factory
- Every sling is load tested to 272 kg
