

## MANGAR Community Chest

### THE SOLUTION TO COMMUNITY FALLS

The Mangar Community Chest is designed to be placed in community areas where falls commonly occur, such as high streets, leisure venues and community centres.

Working in collaboration with community groups, volunteers will be trained to use the product and access the ISTUMBLE® health assessment app, ensuring people who fall are lifted quickly and safely.

### IMPROVING THE OUTCOME OF A FALL

Three key areas where our lifting equipment can improve the outcome of a fall in the community are:

1. Decreasing ambulance wait times
2. Reducing the occurrence of long lies
3. Minimising injuries to carers

### ADDITIONAL TOOLS

Alongside our Community Chests, we have the ISTUMBLE® app, which enables best practice in falls management. Winnicare also provide a quick start guide and comprehensive in-person and virtual training sessions.

### CONTENTS OF THE BOX:

- Eagle Lifting Cushion
- Airflo 24
- Stowage board for charging
- Power supply for stowage board
- Disposable gloves and Clinell wipes
- Temperature control for outdoor boxes
- Quick start guide
